

Assessment criteria for proposals for seed funding from HelseCampus Stavanger:

Quality/Excellence

Originality/Innovation

- The concept is well thought out, credible and innovative.
- The goals for the project are clear and relevant.
- High quality of planned deliverables in the project.

Impact

Potential

- Are expected impacts are sufficiently specified?
- Are expected societal/systemic effects sufficiently specified?

Knowledge sharing and applied knowledge

- High quality of planned communication and dissemination activities.
- Is it credible that the proposed measures in the project will produce the specified impact(s)?

Implementation

Project manager and project team

- The project manager and the project team are qualified and have the necessary overall competence to carry out the project.
- Appropriate management structures and procedures are in place.

Plans and organization

- The project plan is clear and understandable, and the timetable realistic.
- There is coherence between project goals and measures.

- The project is well anchored by the project owner and partners, and the division of roles is clear.
- The budget is realistic, and the resources distributed such that each partner can fulfill their role.
- Possible risks and mitigation of the same have been discussed.
